

With LINDA against phishing!

LINDA's
got it!

L

Links and attachments from people you don't know must never be clicked on.

I

Information contained in emails must be assessed critically.

N

Neutral forms of address in messages raise your suspicions.

D

Deadlines and urgency are suspicious.

A

Address of the sender should always be checked carefully.

Police card-security.ch

DON'T GET CAUGHT!

Debit and credit cards are very secure and popular means of payment that are used frequently. This also attracts fraudsters. Almost every card fraud incident begins with a phishing message.

What is phishing?

Phishing is a scam in which criminals send emails or text messages (e.g. SMS, WhatsApp messages, etc.) to their victims. The messages are designed to entice recipients into sharing their personal information so that their debit or credit cards can be misused. If you are not careful, you can quickly lose a lot of money.

Fisherwoman LINDA helps card users remember the most important rules of behaviour when handling debit and credit cards. Each letter of LINDA's name stands for a mnemonic that can be used to prevent phishing.

LINDA's got it. And you?

Test your
knowledge!
